Tempus Master Clock

- Dimensions 260x160x80mm
- 230 volt mains power.
- Single output line capable of operating up to 50 x 1 minute alternating polarity slave clocks, which can be increased when converter boxes are connected to the second Tower Clock output line. Any number of converter boxes can be added to this output line; each capable of operating up to 75 clocks.
- Capable of operating the Heritage range of exterior clocks, which restricts the number of slave clocks to 50.
- Easy to programme using front LCD display with automatic time setting and correction with link to the antenna that receives the MSF signal.
- Internal battery backup to retain the memory during power disruptions.
