3 cm deep

weiß

Example for display of external transmitted messages and dates

We have developed this clock type **AMC 20** specially for the Elderly, Alzheimer- and Dementia patients and their caretakers. For the first time you have the possibility to send individual messages and appointments as SMS via APP from mobile phones and / or via USB-Port from Laptops or Pc's directly to the clock. With our App (free-of-charge download) you are able to send messages from any location to the clock.

For example, reminders of appointments like doctor consultation, taking medicine, birthdays or whatever kind of message you would like to send, will be displayed on the 3-line clock display until due-date. In addition you can choose to set an alarm that will remind regularly until due-date. This also helps caretakers scheduling as well as the elderly and dementia patients coping in their daily routine.

The fully written weekday, date and respective day parts as well as the time display with the analogue clock face supports person with disordered Day-Night-Rhythm or beginning dementia to structure their course of the day. For fellow citizen of different mother tongues all information can be displayed in 8 different languages. The display in mother tongue also creates a better-well-being.
